Subject: Q3 sales drop in the West region

Hi,

Regional leads are reporting that West sales fell in September, and leadership wants to know why before the Q4 planning meeting on Friday.

Could you look into it? Specifically:

1. Confirm how much West sales changed from July–August to September, and whether the drop is real or a timing effect.

2. Find out what's driving it. Look at discounts, returns, product categories, and customer types.

3. Check whether the pattern shows up in other regions.

4. Give me a one-page summary with two or three charts and a recommendation I can take to leadership.

The data is a CRM export covering July to September 2026. Let me know if anything looks off.

Thanks,
Daniel
Sales Operations Manager
